

MEGATONE ELECTRONICS

The Megatone Electronics Special Edition brings you the exclusive and uniquely designed pen to our users. Combined with our sedulous dedication to details of time and effort, and incomparable with master craftsmanship, we are certain you will love this beautiful product.

To the immediate observation, the curved handgrip are uniquely crafted to fit your fingers, whenever and however you hold the pen, even if you are sweating, the dents imprinted onto the curved slope can assist you in gripping the pen more firmly.

The polished-aluminum surface provides that extra soothing touch to the pen, comfort has been our utmost goal when we were designing this product.

If you are a person on the go, making presentations wherever you stop, holding important conferences, updating your documents via PDA or on Tablet PC, then you should do yourself a favor by getting this pen.

This incredible pen does pretty much what has been described above, and no other pen is capable of. You will find the laser-point and LED light feature at the back of the pen extremely useful, should you need it at any time. Simply press on the button, and it just works.
