

MEGATONE

Prerequisites:

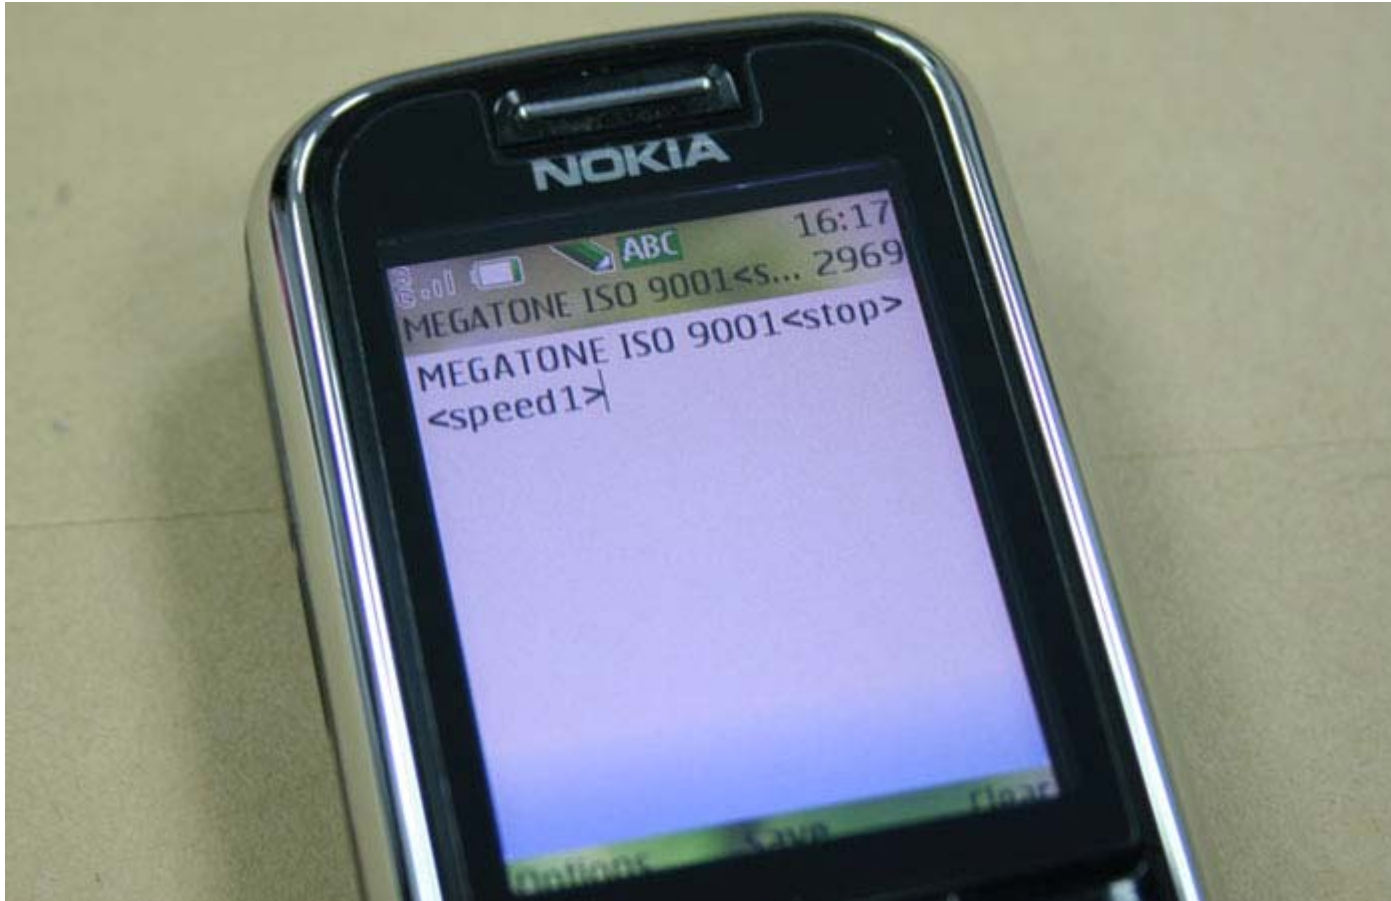

1. Your cellphone has to be capable of infrared.
2. Your cellphone has the function that allows you to create notes.

Once you are ready, create a note to start.

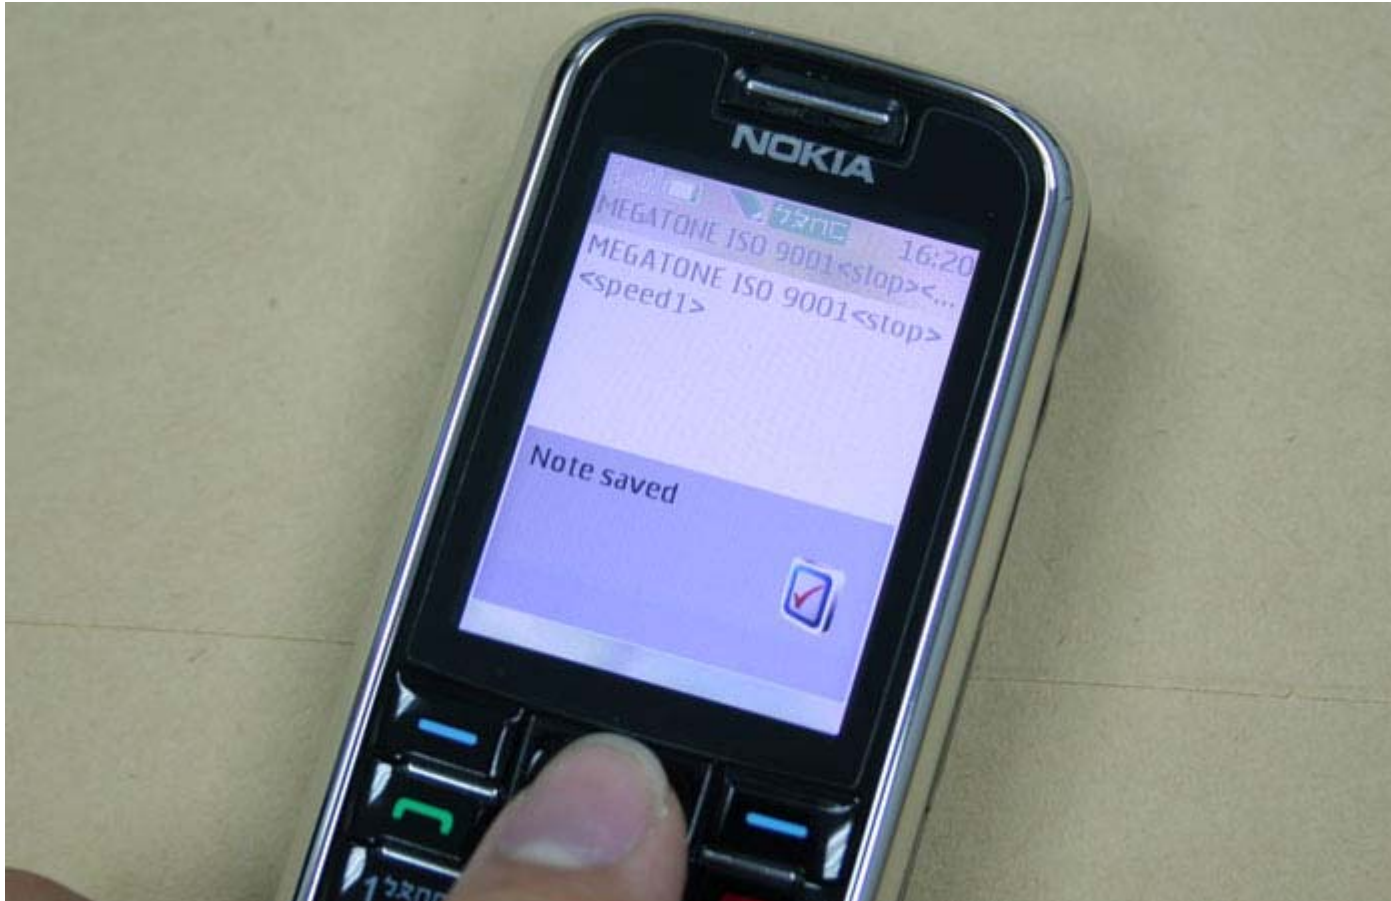

MEGATONE

Enter the text of your choice, in this tutorial, we entered our own company name.

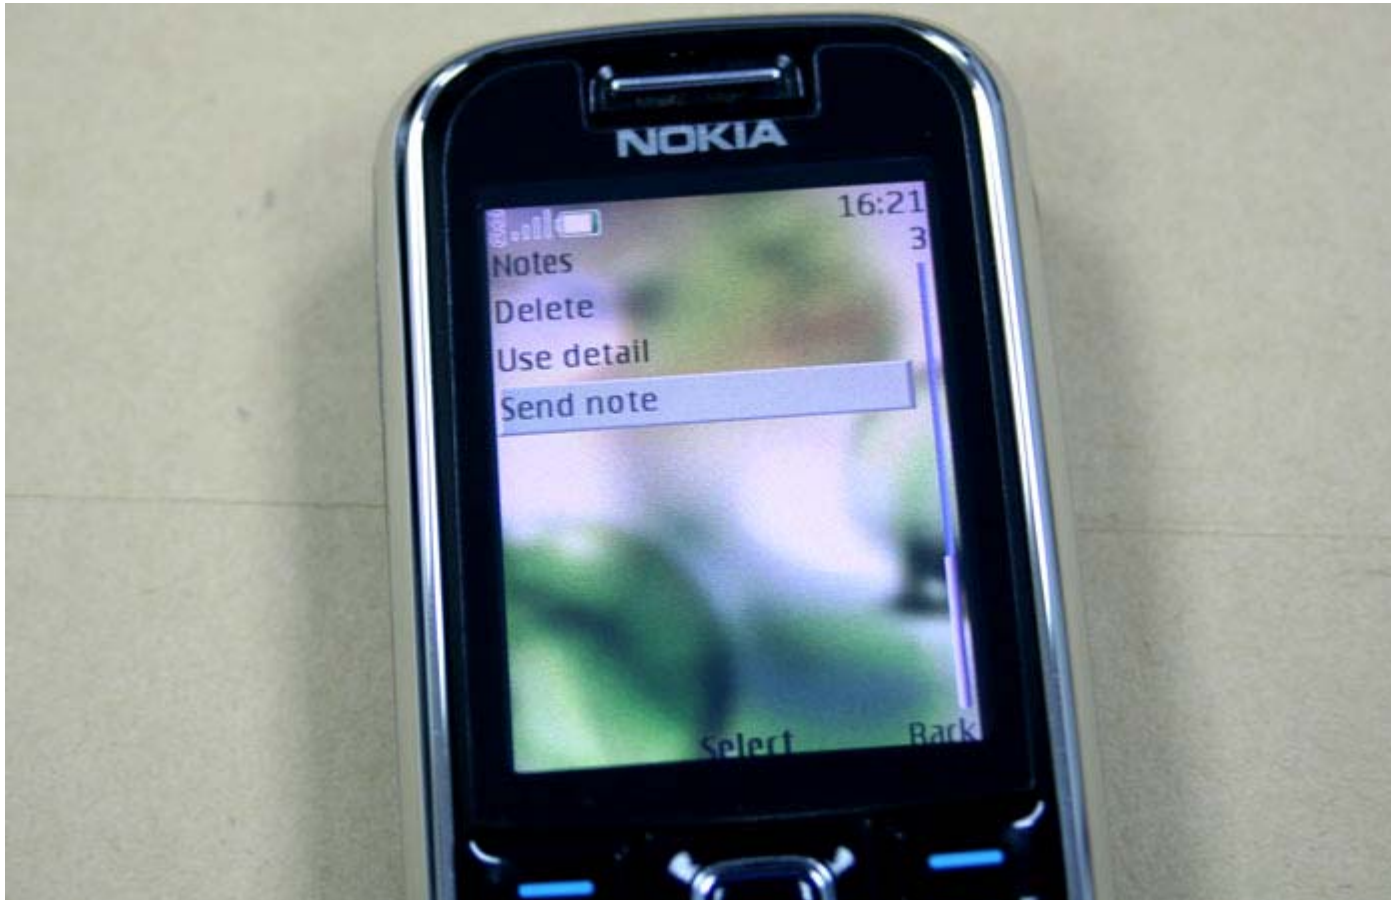

Save the note when you are done, and get ready to send.

MEGATONE

If you have not created your note already, please create one and enter the text of your choice, then get ready to send via infrared.

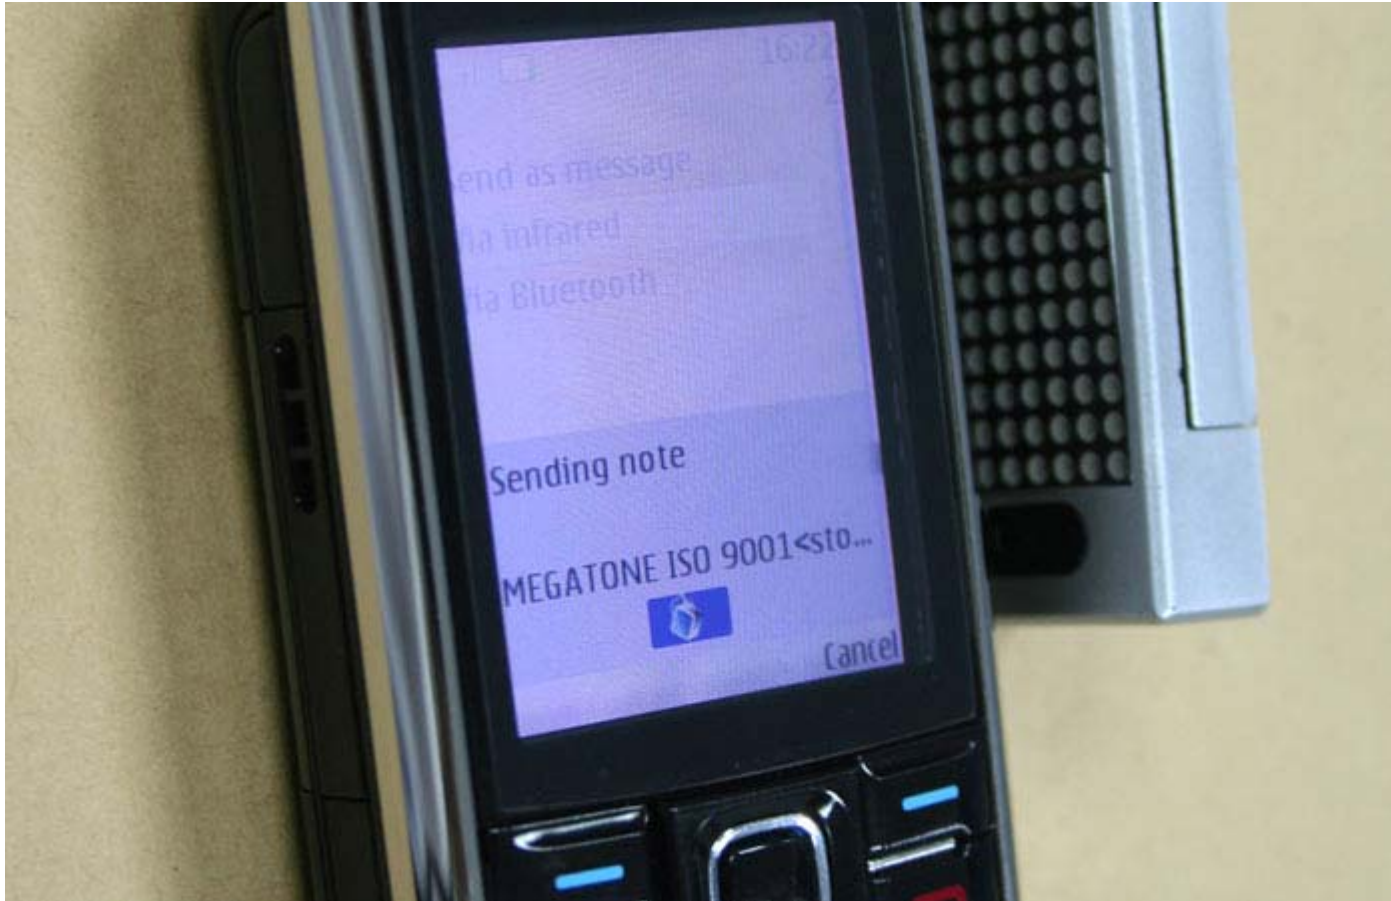

The LED Stream's infrared receiving point is on the right side of the product.

MEGATONE

Send the note once you are ready, and get close to LED Stream's infrared receiving point, in order for it to receive.

MEGATONE

It only takes a short while for the LED Stream to update the text you sent via cellphone's infrared.
As you can see below, the text has been updated on LED Stream.
